

## Transcript

So the first thing I did today was adjust my knows and need-to-knows. I know how to make a grid or I need to make a grid, I know that. And I need know that I need to set those things. But I do know how to put a grid on the screen, sort of. I can get it there. And so I cross that one off. Now, I added a new line to bottom and how to change that grid because I don't have a clue yet. So next, my plans are how to set sheep. So this must be under the Advanced tab. So we'll look at the auxiliary files and start poking around. The main file is just what it is the main. Under modules is going to be what I'm looking for. I have to dig through here to set it
