Okay, so I'm not banging my head on the wall anymore. I'm gonna try a different approach. I'm going to learn something new. And so I went out and designed out in Keynote, just like we have with our students do. I designed out what I wanted this to look like on the app. So here it is with some sheep and there's a couple of wolves in there. I also know that I'm gonna want a score in the corner. So that'll get me started and then I can keep designing more as I go.
