Transcript

Hey, so I was playing around with things and I slowed the sheep down so that they weren't roaming quite as fast. And I also made it so that it didn't put two sheep on top of each other that it actually put them in 50 unique blocks change the way it looks when it sets up but that's something else I can fix. I'm, I'm happy with it right now. So the randomizing is working a lot better the reset will work and you can see the sheep moving around a little bit slower.
