So it's pretty cool, got the reset button working, and I'm going to play with some other buttons, and just getting all of my functionality and that's really a big thing. Don't worry so much about the appearances. As you get the functionality then as you have time, work on the work on the parents make it better. But that's not your first concern. Your first concern is doesn't work. So again, it's you know, don't put style over substance. The reset buttons working as you can see, I'm going to make it look prettier later. Right now I'm worried about functionality.
