It's day 72. And I'm learning a lot of new stuff today. The thing on coding is that you never know everything. There's always something else to learn. And there's always somebody who can show you something that you didn't know before. So I'm working on a tutorial and I'm finding out a lot of new things that I can put into my project and make it a lot better and work on the interactivity that I need for mine. This is a pretty cool game tutorial, and I'm learning a lot that I can apply to my own project and putting lots of things on the screen that all interact with each other and making a bigger field than I used to have.
