I'm back on my project and making some things happen. I've really gotten a lot out of the tutorials. And that really shows that there's a lot to learn, and that you can really get a lot from it. It just takes time. And sometimes it's slow. Sometimes it comes quickly. But it's that relentless forward progress that's so important. At the same time, every time you win one of those little battles, it feels so good. So I'm back into my project. And you can see that the sheep are spawning, but they're all in one spot, but that's okay, because I'm making some things happen. And then also made it where there's a big camera, I've got a bigger field and I can move around but my scoreboard stays in the same place. So I've learned a lot from these tutorials and really putting it into practice.
