Can't believe it's day 87. It's coming down to the end here. And I'm fine tuning the user controls and adding in more features, not really features, but actually just things that the user can control it. But I have to look at how that impacts the code behind the scenes and make little tweaks to make it all work. So I'm getting in more user controls. And as I put more in, I have to think about how to fix the simulation. And then also think about my spacing and sizing and font sizes and all of those things that have to go with it as well.
