As we're getting near the end, it's day 88. And you can see the project really taking shape. There's a lot of little things that need to be done. But we've already solved how to do that. It's more about fine tuning it and refining it and adjusting things and then making all these other little pieces. And that's really the cool part. We've solved all of the big problems. So far, we've done a lot of learning. And now it's just the fine tuning and getting it all together, check out where we're at now. The user controls are coming in well, but they're taking up quite a bit of space. So I've got to work on that as well. So that's just more in my to do list.
